Drake ∅ Summer School of Methods

Opens June 23, 1902,
and continues eight
weeks, closing August
14. ∅ ∅ ∅ ∅ ∅

∅ THIRTEENTH ∅ ANNUAL SESSION

NOTE: In addition to the regular lines of study, a full year's work is offered in Greek, French, German, General History, Algebra, Trigonometry and College Algebra, Geometry, and Physics. Each study requires a student's whole time for eight weeks.

Examination for State Certificates, August 14 and 15, 1902.

Entered at the Des Moines Post Office as Second Class Mail Matter.
Issued bi-monthly by Drake University.

Yearly Subscription, 25 cents.

Faculty

Hill M. Bell, A. M., Director.

Psychology.

Professor Bell is at present Vice Chancellor of Drake University and Professor of Pedagogy in the collegiate department. He has given many years to the problem of preparing teachers for their work.

W. A. Crusinberry, A. M.

Astronomy, Trigonometry, College Algebra, and Arithmetic.

Professor Crusinberry, for many years Professor of Mathematics and Astronomy in Drake University, is at present Principal of the West Des Moines High School. As a teacher of teachers he has few equals.

W. F. Barr, B. Pe.

Physics and Pedagogy.

Professor Barr is known to the teachers of Iowa as a leader among the public school superintendents of the State rather than as a college man. He has been connected with the Normal College of Drake University during the past two years and is regarded as one of the most successful men on the faculty.

I. Frank Neff, B. Pe.

Algebra, Geometry, Economics.

Professor Neff is one of the growing young educators of Iowa, and will be remembered for his excellent work in the Summer School of last year. He is at present teaching in Drake University.

Olive McHenry.

Grammar, Geography, Methods and Literature in the Primary and Intermediate Grades of the Public Schools.

Miss McHenry has for many years been Principal of the Hawthorne School of Des Moines and is known to be one of the ablest school super-

visors of Iowa. She is the author of McHenry's Grammar, a book that ranks as one of the very best issued in recent years. Miss McHenry's work in all the subjects accredited to her for the summer term is masterful.

W. S. Athearn, B. Pe.,

Methods and Grammar.

Professor W. S. Athearn is at present assistant professor of pedagogy in Drake University, and Editor of the Midland Schools, published at Des Moines. Prof. Athearn is regarded as one of the strongest teachers in the state. A course with him will be highly appreciated by all. He will be present the first and fifth weeks.

Ed Amherst Ott, B. Ph.

Lecturer on Reading and Physical Culture.

Professor Ott is at the present time Dean of the Drake University College of Oratory. He is recognized as one of the ablest teachers of his specialty in this country. By public lecture and classroom instruction he has won for himself first place in all that pertains to his art. He will, in his lectures to the summer school, endeavor to acquaint the teachers with a correct method of teaching reading in grammar grades and high schools. Professor Ott will be present during the seventh week.

Jessie M. Place, A. M.

Greek

Miss Jessie M. Place is a graduate of Drake University and is at the present time doing graduate work in Latin and Greek. Professor Kirk, at the head of the Department of Greek Language and Literature, specially commends Miss Place for teacher of this important subject. A full year's

work will be done in each of the Greek classes organized.

William Crocker.

Physiology, Physiography, Botany, and Zoology.

Professor Crocker is at present connected with the University of Illinois. He comes to the Summer School of Methods with the highest commendations.

Edith Mabel Bridges, B. Ph.

German, French, and English.

Miss Bridges is Professor of French and Instructor in German and English in Drake University. Miss Bridges is a master of the specialties that she presents.

C. D. McGregor, M. Accts.

History, Civil Government, Bookkeeping, and Penmanship.

Professor McGregor has for many years been connected with the Normal and Commercial School work in Iowa. He is regarded as one of the ablest members of the faculty of Drake University.

Maud Summers.

Primary Methods in Reading, Language, Arithmetic.

Miss Summers has given such excellent satisfaction in the past that she returns again this year at the special request of those who enjoyed her classes last year. Miss Summers, so long connected with the Chicago Schools, is at present engaged in compiling a series of modern school readers. Her "Thought Reader," published by Ginn & Co., has had a marvelous sale, a large consignment having recently been sent to the Philippine Islands. Miss Summers will be present the last two weeks of the term.

Margaret Lovejoy-Weber.

Public School Music.

Mrs. Weber has been supervisor of

music in the public schools of Des Moines for seven years. In addition to this work she is now Director of the Training School for Supervisors of Public School Music in Drake University. She has no superior in the work of teaching public school music to teachers. Supt. Sheakley says in a recent letter, "Her work is regarded as leading all public school musical training in Iowa." Mrs. Weber will be present the first four weeks of the term.

Donald G. McCash.

Oriboeey and History.

Mr. McCash is a successful teacher specially qualified for the work which he will present to the students and teachers of the Summer School.

Ella Ford-Miller, B. Pe.

Drawing, Primary Methods in Construction Work, Reading and Arithmetic.

Mrs. Miller is a graduate of the Iowa State Normal School and has for many years been recognized as one of the leading primary training teachers in the public schools of Des Moines. She is at present Supervisor of the Primary Training Department of Drake University. Mrs. Miller will be present the last four weeks of the term.

Maud Claiborne-Reno.

Primary Methods in Synthetic Reading, Language, Speer Arithmetic.

Mrs. Reno, now of La Crosse, Wisconsin, was for many years primary teacher in Des Moines and Institute Instructor in Iowa. She has a statewide reputation as a very able instructor. Mrs. Reno will be present during the first four weeks of the term.

Roy Farrand, B. Pe.

Assistant in Mathematics.

Mr. Farrand is an experienced high school teacher, well equipped for this special work.

Huber Gray Buehler.*Grammar and Rhetoric.*

Mr. Buehler, English Master in the Hotchkiss School, Lakeville, Connecticut, is the author of "Practical Exercises in English" and "A Modern English Grammar." This last book has attracted the attention of educators all over the country. It is at great expense that we are able to bring Mr. Buehler to Iowa this year, but we feel that the teachers of the West will fully appreciate the rare privilege of sitting before one so gifted. Mr. Buehler will be present the first two weeks.

Maye Sedgwick.*General History.*

Miss Sedgwick is one of the successful teachers in the Drake University Academy. Those desiring to do an entire year's work in General History will find this class entirely satisfactory.

Edith Koons.*Academic Algebra.*

Miss Koons has made special preparation for this work. This class is intended for those who wish to cover the whole subject of Academic Algebra during the term.

Statement Of Work To Be Offered

GENERAL PROFESSIONAL.

Psychology.
Child Study.
History of Education.
Methods.

School Management.
School Supervision.
School Law.
School Hygiene.

FOR PRIMARY TEACHERS.

Reading.
Speer Arithmetic.
Language.
Literature.
Nature Study.

Synthetic Reading.
Construction Work.
Vocal Music.
Drawing.

FOR GRAMMAR AND INTERMEDIATE TEACHERS.

Orthoepy and Orthography.
United States History.
Physiology.
Penmanship.
Arithmetic.
Literature.

Grammar.
Methods.

Physics.
Economics.
Algebra.
Civil Government.
Botany.
Rhetoric.
Literature.

Geometry.
General History.
Greek.
German.
French.
Vocal Music.
Drawing.
Physiography.

Summer School for Music Supervisors.

A School for Music Supervisors as a department of the Summer School of Methods will be instituted this summer, under the directorship of Mrs. Margaret L. Weber. The term will open June 23, 1902, and will continue during the first three weeks of the summer term. All persons desiring special training of this character will find this school offering most excellent courses of instruction. Technical instruction, sight reading, care of the child voice, interpretation of song, art of conducting, methods of presentation, duties of supervisors, etc., are some of the special features of the course.

Music teachers, who are occupied during the regular school year, will find this an excellent opportunity to do some thorough work in the summer vacation.

The tuition for the summer term of three weeks will be \$15. Students taking this work will be permitted to take other studies in the Summer School of Methods without additional expense, if they so desire. Send for our special announcement of the Training Department for Supervisors of Public School Music at Drake University.

A Full Year's Work

Is offered in Greek, French, German, General History, Trigonometry and College Algebra, Geometry, and Physics at the regular tuition of \$11.00 for the term. Any one of these studies

constitutes full work for the eight weeks. Those taking physics will pay a laboratory fee of \$4.00 to cover cost of material used.

English Grammar.

We are pleased to announce that Professor Huber Gray Buehler, Master of English in the Hotchkiss school at Lakeville, Conn., has been engaged to give special instruction in English Grammar and Composition in the opening weeks of the Summer School of Methods at Drake University. Mr. Buehler will need no introduction to those teachers who are familiar with his excellent text books in English.

This will be his only engagement in the West as he goes directly from here to England for special work during the rest of the summer.

To teachers interested in teaching elementary English in the manner prescribed by modern methods of instruction, we can only say that the opportunity is here offered to spend two weeks in the class room with one of the ablest and most successful teachers of English in the country.

Professor Buehler and Miss McHenry, each the author of an excellent modern English Grammar, will enable the Summer School of Methods to offer exceptionally strong work in this important subject.

Polk County Teachers.

County Superintendent Z. C. Thornburg has arranged for all Polk Coun-

ty public school teachers holding Polk County certificates to attend

the Summer School of Methods by paying three dollars. At the close of the Summer School of Methods an examination will be held to accommodate those teachers desiring certificates. The foregoing statement does not apply to teachers who hold Polk County certificates unless they have taught in Polk County at least two months during the past year. Grades

made in the Summer School by Polk County teachers will be accepted in lieu of any examination in the subjects pursued.

Teachers of Polk County desiring more definite information should write to Superintendent Thornburg or call upon him at the rooms of the County Superintendent.

The Books.

Jordan Brothers, the University Book Dealers, will have complete charge of all books and supplies of this character. In order that this feature may be as helpful as possible, Mr. Jordan will have large quantities of his supplies displayed and on sale

in the University Building. Teachers' helps for all grades of work will be shown. The leading book houses of the country will be represented. If you wish to get your books before coming, address The University Book Store, Des Moines, Iowa.

General Information.

NORMAL INSTITUTE

Many County Superintendents will excuse their teachers from attendance at the County Institute and from examination for certificate, if they will attend the Summer School.

EXPENSES

The tuition for any part or all of the term is eleven dollars. Tuition is never refunded for any reason. *Do not ask to have this rule abrogated, as it will not be done.* Board, with room furnished and lighted, may be secured at from \$3.00 to \$3.50 per week. The total expense for the entire term need not exceed \$40 to \$50. Teachers should write the director, Prof. Hill M. Bell, to secure board and room in advance.

LATIN AND GREEK

Students regularly enrolled in Professor Denny's Summer Latin School will be permitted to take one class in the Summer School of Methods for \$4, two classes for \$7 and three or more classes for \$10. The

tuition in the Summer School of Methods is the same for any part as for the whole term.

Students in the Summer School of Methods can take Latin in the Summer Latin School during the session of the Summer School of Methods, on the following terms: \$4 for one class period, \$7 for two, and \$10 for three.

PRIVATE LESSONS

The teachers employed to instruct in the Summer School of Methods will not give private instruction to any students who are not enrolled regularly in the Summer School of Methods.

FROM THE STATION TO THE SCHOOL

On arriving in Des Moines, take the nearest street car for Drake University. Professor Bell will be found in his office in the main University Building, and he will assist all in arranging for board and room. We will take especial interest in providing everyone with a comfortable home during his stay in the city.

BAGGAGE

Bring your trunk check to the University and we will have your trunk taken to your room for 25 cents from any station on the west side of the river, and for 35 cents from the east side of the river.

WHEN TO COME

Come Monday, June 23rd. All classes will recite Tuesday, the 24th. Those attending should make it a point to be present during the entire term. However, a single week at the Summer School will be worth the cost of the entire term.

MONEY

Never put your money in your trunk, as it involves too much risk.

THE MANAGEMENT OF THE SUMMER SCHOOL

The Summer School of Methods is strictly under the control and direction of the Board of Trustees of Drake University, and they hold themselves accountable to the public for the maintenance of the high standing of the school. The University has designated Dean Hill M. Bell and Prof. L. S. Ross to be associate managers of the school. The special work of conducting the school devolves upon Dean Hill M. Bell as its Director. In order that correspondence shall receive prompt attention, all communications should be addressed to

Hill M. Bell, *Director*,
Des Moines, Iowa.

Hill M. Bell }
L. S. Ross } Associate Managers.

Summer School of Greek.

There are not many places where an opportunity is afforded to do work in Greek during the summer vacation. Our summer school of Greek gives to high school graduates and college students an opportunity to make up back work in this study. If you intend to enter college next year, you will need at least one year's work in Greek. Courses will be offered in the first three years' work as usually offered in academy and college.

Course 1—Completes White's First Lesson, book one of Xenophon's Anabasis and work in composition.

Course 2—Includes books second and third of Anabasis, with composition based on the text read; four orations of Lysias and books one and two of the Iliad or Odyssey.

Course 3—Will include one or two of Plato's works, the oration on the Crown by Demosthenes and one of the tragedies of Aeschylus or Sophocles. Lectures on Old Greek Life, Art and Literature will supplement the text for advanced students. For further information, address Hill M. Bell, Des Moines, Iowa.

ZOOLOGY.

Wm. Crocker, Prof. of Biology.

A course in General Zoology will be offered during the session of the School of Methods. The term will begin June 23 and will close August 14.

The course consists of laboratory work, lectures, reading and recitations. Laboratory studies of animal types are carefully made, the morphology and physiology of the groups compared and their place in nature discussed. The first part of the

3 0112 105724667

course is devoted to the study of invertebrata. Some time is given to Protozoa, this being followed by work upon the lower Metazoa. Among other laboratory studies are those of the Hydra and the Earthworm. Of the higher invertebrata the Arthropoda receive much attention, special study being made of the Crayfish and of types of the Insecta. About two-thirds of the term is spent upon the invertebrata, the remaining time upon the vertebrata and in a general review of Zoology as presented in Hertwig-Field's General Principles of Zoology.

The class will meet for work six days in the week, and only those students who can devote their entire time to the subject will be admitted. One year's credit will be given to those completing the work outlined. Tuition for the course is \$15. A laboratory fee is charged to cover the cost of material used.

For further information address Hill M. Bell, Des Moines, Iowa.

ORATORY, READING, AND PHYSIOAL CULTURE.

Many teachers and others interested in the training of the voice will want to take advantage of the classes conducted during the summer by Prof. Ed Amherst Ott and his assistants at Drake University. This is Prof. Ott's last season in Iowa, and it will, of course, be more difficult to reach his classes in Chicago. The methods of training the voice and of developing the body to its highest state of expression, health and beauty have made the classes at Drake justly popular. It will be well for any who are interested to write early to Ed Amherst Ott, Des Moines, Iowa, for full information concerning the Summer School of Expression.

SUMMER SCHOOL OF SHORTHAND.

No class of young people, on the average, are better prepared to study stenography and typewriting than the public school teachers.

Their attainments permit rapid progress. Their business experience assists in getting and holding positions. The prospects for earning good salaries TWELVE MONTHS in the year, together with the limitless

opportunities afforded to competent shorthand writers in the business world, make it worthy your investigation.

Young man! Young woman! Why not double your income—and your usefulness? Why not multiply your career by ten—twenty—a thousand? Who shall set the limit? You must. Are you living up to your opportunities?

We will give thorough instruction in the Graham system. Tuition for the eight weeks \$15. Term opens June 23.

Address C. D. McGregor, Drake University.

SUMMER SCHOOL OF CHEMISTRY.

Opens June 23, closes August 15, 1902. The following courses will be offered: General Chemistry, 1st year (Text, Newth); Qualitative Chemistry, 2d year (Text, Fresenius); Quantitative Chemistry, 3d year (Clowes & Coleman).

Every opportunity will be offered for good work. The laboratories are cool, well lighted and roomy, and the classes small. Adequate chemicals and apparatus will be furnished and skilled assistants have been obtained to assist in the work. A year's work in one line may be accomplished by devoting all one's time to the work.

Apply early, as the classes will be limited. For particulars address Charles N. Kinney, Professor of Chemistry, Des Moines, Iowa.

SUMMER LATIN SCHOOL.

Twelfth annual session, of nine weeks, commences June 23, 1902. Charles O. Denny, A. M., Professor of Latin in Drake University, Principal.

Four courses are offered as follows: Course I, for beginners. Course II, Caesar and Cicero. Course III, Virgil and Ovid.

Adequate prominence is given to Latin Syntax, Composition, Pronunciation, Quantitative Reading, Scansion, Sight Translation, Roman Life and Method of Presentation.

Teachers who wish to review and gain helpful suggestions for their work find the school excellently adapted to their needs.

For prospectus address the Secretary, Wilbert L. Carr, Drake University, Des Moines, Iowa.

For Information regarding the Summer School of Methods,
address Hill M. Bell, Des Moines, Iowa.
